PROFESSIONAL SUMMARY

Full-stack web developer with 1+ year of experience building CRMs and business software in PHP and Laravel, from backend logic and database design to Blade-based frontends. Currently developing features for a US-based SaaS platform, and led a team of 5 to deliver around 10 projects. Experienced in integrating payment, shipping and OTP services (Razorpay, PayU, Shiprocket, MSG91) into e-commerce sites.

EXPERIENCE

Web Developer | FutureOne Global IT Solutions Pvt. Ltd. | April 2026 – Present

- Build full-stack PHP Laravel applications, creating CRMs and business software with backend logic, database design and responsive Blade interfaces.
- Develop features for a US-based SaaS platform on Laravel, including database changes, server-side logic and frontend screens across multiple business modules.
- Led a team of 5 developers to deliver around 10 projects successfully, from requirements through to delivery.
- Translate business requirements into new features and refine them as needs change.

Junior Web Developer (Internship) | FutureOne Global IT Solutions Pvt. Ltd. | October 2025 – April 2026

- Built and customized CRM and business software modules in PHP, covering both server-side logic and user interfaces.
- Designed and built a WooCommerce/WordPress website, from layout and design through to product setup.
- Integrated Razorpay and PayU payments, Shiprocket shipping and MSG91 OTP verification.

ACHIEVEMENTS

- Led a team of 5 to deliver around 10 projects successfully.
- Converted from intern to full-time Web Developer within 6 months.
- Shipped CRM and business software that client teams now use day to day.

TECHNICAL SKILLS

Core: PHP, Laravel, Blade, MySQL, JavaScript, HTML, CSS, Bootstrap

Also: REST APIs, MVC, Java, Spring Boot, Python, C, C++

Platforms: WordPress, WooCommerce

Integrations: Razorpay, PayU, Shiprocket, MSG91, SMTP, SFTP

Tools: Git, GitHub, MySQL Workbench, VS Code, IntelliJ IDEA, Eclipse

PROJECTS

US-Based SaaS Platform – POS, Fuel & Lottery Management | Professional Project

- Develop a Laravel-based SaaS platform for US retail and fuel-station businesses, with POS, fuel management and lottery management modules.
- Worked on shift-control logic that restricts each station terminal to one open employee shift at a time.
- Built the service layer and database changes to sync a state lottery's scratcher game catalog into the lottery terminal.
- Developing a weekly tobacco scan-data export that generates a 34-field pipe-delimited file, maps product UPCs, uploads over SFTP with a demo-to-production switch set through configuration, and runs on the Laravel Scheduler.

  Tech Stack: PHP, Laravel, Blade, MySQL, JavaScript, SFTP.

Laravel CRM & Business Software | Professional Project

- Created CRMs and business software in Laravel, with database design and responsive Blade interfaces.
- Turned client workflows into working modules and refined them against business requirements.

  Tech Stack: PHP, Laravel, Blade, MySQL, Bootstrap.

Data Center Migration & Relocation CRM | Client Project

- Added and customized a new CRM module tailored to the workflows of a company offering data center migration and relocation services.
- Took the module from requirement to deployment across backend and frontend, and delivered it for production use.

  Tech Stack: PHP, MySQL, JavaScript, HTML, CSS.

Hair & Wig Manufacturer CRM | Client Project

- Developed a new CRM module to manage the internal company data of a hair and wig manufacturer.
- Built the backend and frontend around the client's internal workflow; their team now uses it day to day.

  Tech Stack: PHP, Laravel, MySQL, JavaScript, HTML, CSS.

WooCommerce Websites (8–10 Delivered) | Client Projects

- Built and delivered 8–10 WooCommerce websites covering layout and design, product setup and store configuration.
- Integrated Razorpay and PayU payments, Shiprocket shipping and MSG91 OTP-based verification.

  Tech Stack: WordPress, WooCommerce, PHP, Razorpay, PayU, Shiprocket, MSG91.

AI Email Writer | Personal Project

- Developed an AI-powered email assistant that generates context-aware replies and stores conversations for later reference.

  Tech Stack: Java, Spring Boot, MySQL.

Frontend Website with SMTP Integration | Personal Project

- Built a frontend website and configured SMTP so that form submissions are delivered as emails.

  Tech Stack: HTML, CSS, JavaScript, PHP, SMTP.

Real-Time Weather Website | Personal Project

- Created a weather app that fetches and displays live weather data through API integration.

  Tech Stack: HTML, CSS, JavaScript, Weather API.

Personal Portfolio Website | Personal Project

- Designed and published a portfolio website showcasing skills, projects, knowledge and education.

  Tech Stack: HTML, CSS, JavaScript, Netlify.
